# DETAILED ACTION

## **Preliminary Comments**

1. The Terminal Disclaimer filed on 4 Sept. 2003 disclaiming the terminal portion of any patent granted on this Application which would extend beyond the expiration date of U.S. Patent No. 6,561,706 (13 May 2003) has been reviewed and is accepted. The Terminal Disclaimer has been recorded. Applicants' Amendments dated 4 September have also included new claims which contain allowable subject matter as written, and which were based on earlier claim language. Accordingly, the following represents a reasoned statement for allowability.

## Allowable Subject Matter

- Claims 14-20 and 22-33 are allowable, since the prior art references, either considered alone or in combination, do not disclose or render obvious the limitations set forth therein.
- 3. Referring to Claim 14, the prior art references, either considered alone or in combination, do not disclose or render obvious the limitations whereby a method of regulating gate oxide formations comprises defining the wafer as a plurality of portions, directing and collecting light on the gate oxide layer to determine the thickness and/or uniformity of at least one gate oxide layer and controlling the layer formers therefrom, in combination with the remaining limitations in the claim. Claims 15-19 are allowable based on their dependency upon the claim from which each is dependent. Referring to Claim 20, the prior art references, either considered alone or in combination, do not disclose or render obvious the limitations whereby a method of regulating gate oxide formations comprises partitioning the wafer into grid blocks, determining the

. .

thickness and/or uniformity of at least one gate oxide layer corresponding to respective grid blocks, and controlling the layer formers therefrom, in combination with the remaining limitations in the claim. Referring to Claim 22, the prior art references, either considered alone or in combination, do not disclose or render obvious the limitations whereby a method of regulating gate oxide formations comprises defining the wafer as a plurality of portions, directing and collecting scattered light on the gate oxide layer to determine the thickness and/or uniformity of at least one gate oxide layer and controlling the layer formers therefrom, in combination with the remaining limitations in the claim. Claims 23-28 are allowable based on their dependency upon the claim from which each is dependent. Referring to Claim 29, the prior art references, either considered alone or in combination, do not disclose or render obvious the limitations whereby a method of regulating gate oxide formations comprises partitioning the wafer into grid blocks, directing and collecting scattered light on the gate oxide layer to determine the thickness and/or uniformity of at least one gate oxide layer corresponding to respective grid blocks, and controlling the layer formers therefrom, in combination with the remaining limitations in the claim. Claims 30-33 are allowable based on their dependency upon the claim from which each is dependent.

## Comments

4. With regard to the IDS references without publication dates, the Examiner acknowledges that Applicants have been unable to locate, after reasonable inquiry, the dates and other such information which might bring certain references into compliance with 37 CFR §1.98(b)(5). Accordingly, the references identified in the previous Office Action as not complying with §1.98(b)(5) have been withdrawn from consideration.

### CONCLUSION

- 5. Applicants' Claims 14-20 and 20-33 are allowed based on the reasons set forth above.
- Applicants' Claims 1-13 and 21 have been canceled.
- 7. Any inquiries concerning this communication from the Examiner should be directed to Vincent P. Barth, whose telephone number is 703-605-0750, and who may be ordinarily reached from 9:00 a.m. to 5:30 p.m., Monday through Friday. The official fax number for communications to the group is 703-872-9306. Note that this fax number is new, and replaces the numbers provided in previous communications from the group.
- If attempts to reach the Examiner prove unsuccessful, the Examiner's supervisor is Frank
   Font, who may be reached at 703-308-4881.
- Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-17\$\frac{1}{2}\$.
